Overview

I am a driven CEO and entrepreneur building Web startups. TGN Game Communities Inc (or simply TGN) exceeded \$1 million annual top-line revenue only 1 year after we began focusing our business model on YouTube in 2011!

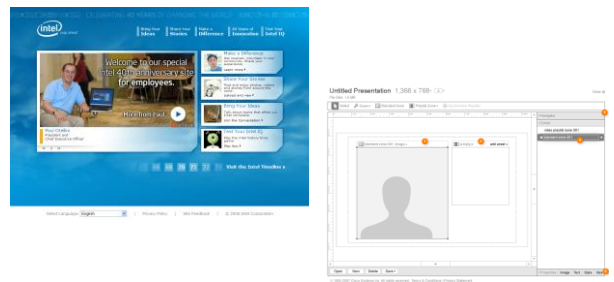

TGN Founded TGN in 2009, creating communities around popular games. Built the company up to support 125 game communities and 20 web properties with over a million unique monthly visitors, acquiring Stratics on May 19, 2010. See www.thegamenet.com

Microsoft At Microsoft, built the Hotmail.com header that ran on 400 million desktop from Sep 2007 to Sep 2008 and met federal accessibility requirements.

Intel For Intel, managed and developed the Intel 40th Anniversary intranet that celebrated 40 years of innovation and allowed all of Intel's employees worldwide to upload photos, share their stories and play a Jeopardy-like game to test their knowledge.

Cisco For Cisco, managed the development of the Digital Media Designer front-end, implemented in Java Swing.

Ask At Ask.com, built the Ask header, Ask image library and organized weekly Engineering Excellence seminars to train Ask's other web developers.

Timeline

Time Period Description

Present to 2009 May

TGN
Founder and CEO

Responsibilities

- Build a new business around game communities
- Establish partnerships and revenue share deals with game communities
- Optimize revenue based on web analytics and gamer behavior

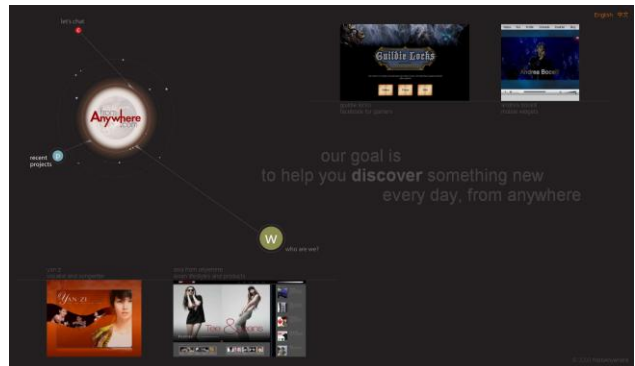

2009 May to 2008 Feb

fromAnywhere.com
Principal

Responsibilities

- Establish a new start-up
- Recruit the team
- Write the business plan
- Pitch to investors

2008 Feb to 2007 Apr

yanzilive.com
Director of Web Development

Responsibilities

- Manage five designers
- Conceive ten Sun Yan Zi themes
- Promote the site in Chinese and English

2008 Jan to 2007 Oct

Ask.com
Senior Software Development Engineer for Web Apps

Responsibilities

- Prototyping
- Engineering Excellence talks
- Ask image library
- Ask global header

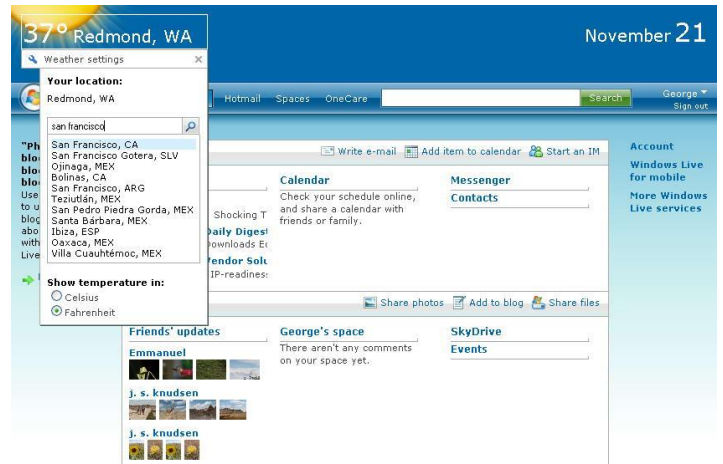

2007 Oct
to
2006 Jul

Microsoft
Software Development Engineer
Windows Live Shared Controls Team

Responsibilities

- Front-end web developer
- Javascript platform architect
- Accessibility engineer

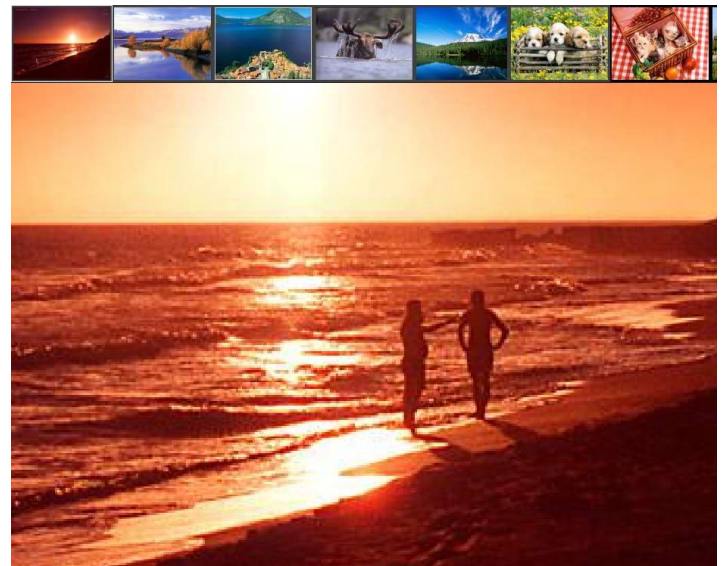

2006 Jul
to
1998 May

Reality Designs Inc.
Self-Employed

Designed, developed and shipped

- evergallery.com
- p3tools.com
- osless.com
- evergamer.com

1998 May
to
1993 Sep

Simon Fraser University
Full-time studies

Two independent majors

- Mathematics
- Computer Science

Awards

- Maple scholarship
- Excellence in Mathematics Award

SS2.6 BERNOULLI AND RICATTI EQUATIONS

Bernoulli Equation

Solve the equation $\frac{dy}{dx} + P(x)y = Q(x)y^n$

$$\frac{dy}{dx} + P(x)y = Q(x)y^n$$

$$\Rightarrow y^{-n} \frac{dy}{dx} + P(x)y^{1-n} = Q(x)$$

$$\text{let } w = y^{1-n} \Rightarrow \frac{dw}{dx} = (1-n)y^{-n} \frac{dy}{dx}$$

$$\Rightarrow \frac{1}{1-n} \frac{dw}{dx} + P(x)w = Q(x)$$

$$\Rightarrow \frac{dw}{dx} + (1-n)P(x)w = (1-n)Q(x)$$

$$u(x) = e^{\int (1-n)P(x)dx} = e^{(1-n)\int P(x)dx}$$

$$\Rightarrow w = \frac{1}{u} \int u(1-n)Q(x)dx + \frac{c}{u} = (1-n)e^{-(n-1)\int P(x)dx} \int Q(x)e^{(n-1)\int P(x)dx} dx + ce^{-(n-1)\int P(x)dx}$$

$$\Rightarrow y^{1-n} = (1-n)e^{-(n-1)\int P(x)dx} \int Q(x)e^{(n-1)\int P(x)dx} dx + ce^{-(n-1)\int P(x)dx}$$
